Sports Perimeter System

01

Sports Perimeter System is a specialized system which is developed to meet demands of sports gyms for multimedia publishing

02

The system can integrate all the LEDs, LCDs and projectors in the gym into a system. It allows centralized publishing management to build the gym's exclusive ads and information network. The system is easy to operate and user-friendly and will help you manage information publishing efficiently.

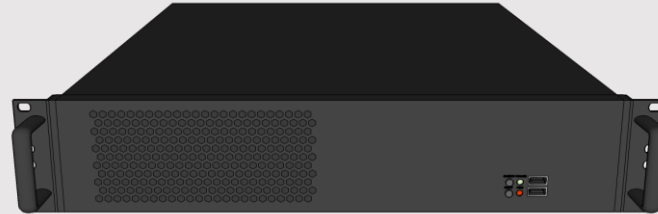

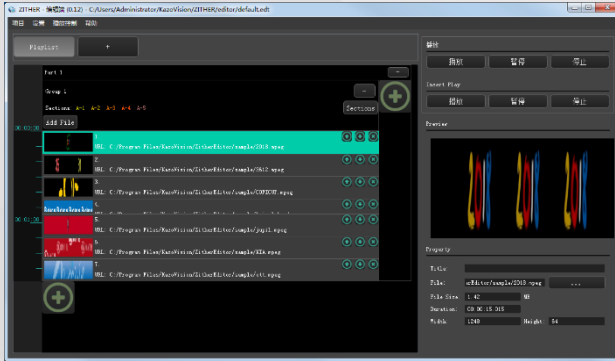

03

The technology we are using can synchronize all videos via the software which is more flexible and convenient than the hardware synchronization technology and it will also reduce your cost. .

A wide-angle photograph of the Estádio da Luz in Lisbon. The foreground shows the lush green grass of the football pitch with white boundary lines. The middle ground is filled with rows of blue stadium seats, many of which are empty. Behind the seating area, there are several white, tent-like structures. The background features a dense urban landscape with various apartment buildings and two tall, slender communication towers under a clear blue sky.

2019 June, Wuhan Olympic Sports Center

Zither Software

- Supporting program folded display and synchronous output.
- Supporting variety formats of video, image and character.
- Supporting HD and 4K output.
- Multiple display effects.

Zither Player

Type: KS-ZP-HD

Digital Signage System

01

This system is composed of "editor", "terminal" and a WEB server. All terminals are monitored and managed by a WEB server and all media files are edited on the "editor". All terminals only need to connect with the Internet to communicate with the WEB server automatically and will feed back their current state to the server regularly and receive the program files for automatic timing displaying.

02

This is an advertising system which suits to various network operators, it contains advertising programs' edition, distribution, broadcasting, management and statistics. It can distribute programs and control the terminal remotely through the Internet. It can also possesses rich features to meet different needs of Ad show occasions.
