

Scoring & Timing Solution for Baseball & Softball

1. Introduction

This is a professional solution for LED scoreboard display in baseball competitions.

The system is applicable to international and domestic standard baseball competitions.

Match arrangement, real-time scoring & timing display, players' & referees' info display, rank statistics export & print, slow motion video record & playback, and advertising display can be realized through the coordination of Match Scoring System, Meet Management System, Video Arbitration System, etc.

Applicable rules of the system:

- 《OFFICIAL BASEBALL RULES 2021 Edition》

2023 U18 Women Softball Asia Cup

1.1 System Architecture

The whole system is composed of several subsystems, including Match Scoring System and Meet Management System.

Each subsystem can not only work independently but also work together to share the data.

It is flexible for customers to configure according to the actual application.

- **Match Scoring System**

Match Scoring System named ULTRA SCORE is composed of Ultra Score Software, Scoring & Timing Host, Pitch Clock, BSO Screen, Display for Ball Speed, Ball Speed Sensor, etc.

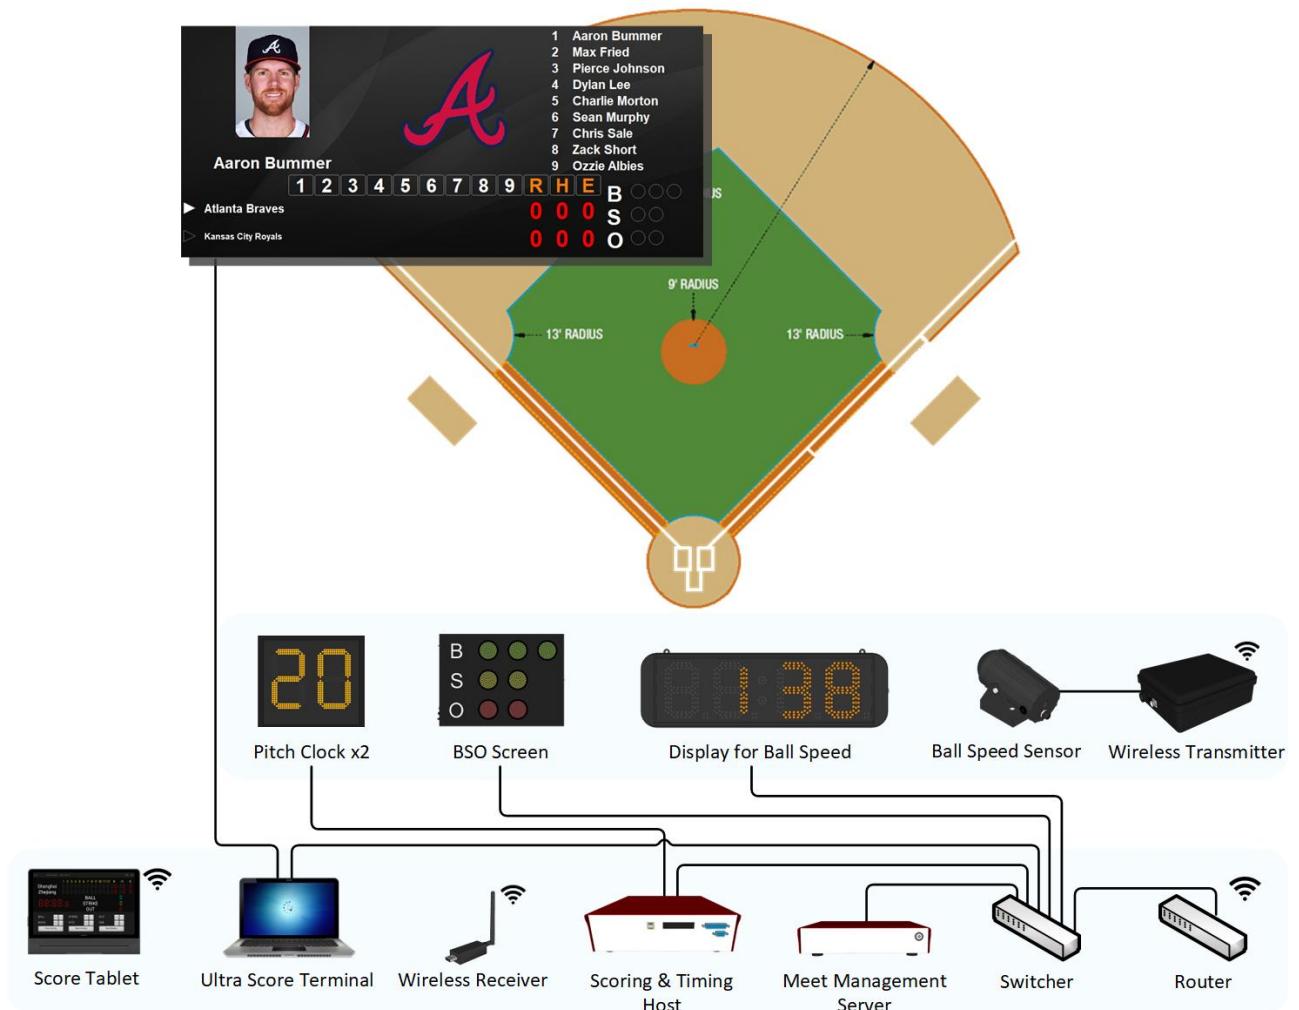

It is mainly operated by the referees to realize the scoring and timing work and real-time scoreboard display.

- **Meet Management System**

It is composed of Meet Management Server, On-Venue Results Workstation, Printer, etc.

Linking with Online Registration System and Match Scoring System, it can realize: participants management, match schedule, result management, court arrangement, rank statistics, etc.

1.2 System Structure

System Description

- 1) **LAN:** A LAN will be established within the venue to connect the LED display control PC, Scoring & Timing Terminal, Scoring & Timing Host, Meet Management Server, Display for ball speed, and BSO screen to the network.
- 2) **LED Screens:** 1-2 LED screens will be installed on both sides of the field. A control room will be equipped with 1-2 control PCs to manage the screens which will be connected via network cables or fiber optics and operated by the scoring & timing software.
- 3) **Scoring & Timing Host:** It is the core scoring & timing device which is installed on the referee table and supports hot backup redundancy.
- 4) **Pitch Clock:** Installed in the home plate area, connected to the Scoring & Timing Host via RVV5*0.5 cables and used with Ultra Score to display the pitcher's countdown timer.
- 5) **BSO Screen:** Connected into the scoring & timing system via network cable to display balls, strikes, and outs (BSO).
- 6) **Ball Speed Sensor:** Installed near home plate, wirelessly communicating with the referee's PC via a transceiver to measure pitching speed.
- 7) **Display for Ball Speed:** Installed in the home plate area, connected to the scoring & timing system via network cable to show real-time pitching speed.
- 8) **Meet Management Server:** It is the core data processing device which is set on the technical table and connected into the scoring & timing system via network cable.

Standard Network Edition	<ul style="list-style-type: none">◆ Terminal + 1 Display◆ Supports: Baseball◆ English version◆ Including 1 dongle

Difference:

Standalone Edition:

Match management, Scoring, and Media display functions, all in one installed on a PC. Referee must do operation on the PC for display directly.

It is suitable for the stadium where has just one screen, which doesn't have strict needs of the scoring and timing accuracy.

Network Standard Edition:

Score terminal and media player functions can be installed on 2 PCs respectively. So that one independent PC can be setup on the courtside special for referee's operation, the other PC running as media player to manage the LED display.

It is suitable for the stadium where has one screen, needs to do the scoring and timing on the courtside.
